What aspects of OSS
might benefit Academia?

What are ways that GitHub
is a useful tool for academics?

Successful OSS project

What call to action would
you have for academics?

Resources

- Jupyter (iPython) notebooks on GitHub - <https://github.com/blog/1995-github-jupyter-notebooks-3>
- Make your code citable: <https://guides.github.com/activities/citable-code/>
- Zenodo - Run by CERN. Webhook that takes a release and issues a DOI.
<http://zenodo.org/>
- GitHub Flow in the browser - <https://help.github.com/articles/github-flow-in-the-browser/>
- Git Large File Storage - <https://github.com/blog/1986-announcing-git-large-file-storage-lfs>
- GitHub Archive - a project to record the public GitHub timeline, archive it, and make it easily accessible for further analysis. <https://www.githubarchive.org/>
