cat
airplane
road
sheep
chair
cow
bird
tree
sign
grass
flower
building
bicycle

A random selection of results on the MSRC dataset, including successes and failures. Left: test image. Middle: ground truth. Right: our result. Image-level prior is used. Black pixels in the ground truth are 'void' and not used for evaluation. More results overleaf. (NB although the ground truth is displayed here spatially quantized, the evaluation metric is at full resolution.)

boat	car body	face dog	water cat	airplane road	sky chair	sheep book	cow bird	tree sign	grass flower	building bicycle
